

**WELCOME TO CREATIVE MATH HOMEWORK and TEST TAKING SERVICES**

**All Solutions by College Math Professor**

**I will be short about this. I am not a high school student or a college math major trying to earn extra money doing homework for students. I earned my bachelors and masters degree in mathematics over 25 years ago and since then I have been a full-time college math professor at a community college until my recent retirement. Mostly as a student, I have tutored students in excess of 10,000 hours. I use to say that I saw it all but at this point in my life I can say that I saw it all twice.**

**I am willing to do assignments from Arithmetic through Calculus 3, Discrete Math, Finite Math, Linear Algebra and Probability Theory--please no Statistics (although I can help with the Probability sections in a Statistics course)**

**I charge at the rate of \$50/hour. I can either write up the solutions and then email them to you or if you like I can make a recording of the solutions.**

**I guarantee you that my work will be correct. If you are unhappy with the work I have done for any assignment then just ask for a refund.**

**You can contact me at 845 399 8136 (Steven) or at [mathtutoring1@hotmail.com](mailto:mathtutoring1@hotmail.com)**

**Check out my youtube channel [nothing but math proofs](#)**
